Upon further consideration, the indicated allowability of claim 2 has been withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lang 6,663,455 (of record) in view of Lovik 4,848,773 (newly cited).

Lang shows a balloon having two sheets joined at a periphery, a valve, and an area 22 which could be marked with crayon or paint. There does not appear to be a printed area around the colorable area. A printed area would be desirable as a frame or guide for the colorable area. For example, Lovik shows that a balloon may include a portion 32 available for marking, and printed lines surrounding the area as a frame. This would enhance the appearance of the

balloon of Lang. It would have been obvious to one of ordinary skill in the art to provide a printed area around the markable area of the balloon of Lang, as suggested by Lovik.

Claims 4-12 are allowed.
